

A Modular Foundation **FOR DYNAMIC, STORY-DRIVEN EXHIBITS**

Vector Frame® Master Kits give you a versatile, functional, and modular foundation for achieving dynamic exhibit environments. Each kit leads with a contemporary SEG backwall that transforms into a branded experience as you choose from kits with functional accents that bring brand stories to life.

With modularity at the core, select the kit that perfectly aligns with your needs and leverage the depth, functionality, and engagement added by the following accents.

Discrete STORAGE CLOSETS

Keep personal items, supplies, or product inventory out of sight while contributing architecturally to the design.

Slotted MERCHANDISE HANGING WALLS

Easily incorporate shelving or hanging hardware to showcase merchandise.

Overhead ACCENT LIGHTS

Add illumination to highlight key messaging, graphics, or featured products.

Monitor MOUNTS

Bring motion and multi-media content into the space to engage visitors, demo capabilities, or share brand stories.

CUSTOM PROJECT INSPIRATION

Otus

Otus used a Vector Frame Master Kit as the foundation for their custom 10'x20' exhibit, creating a clean and functional space that showcased their brand with clarity. Seamless SEG graphics delivered a smooth visual canvas, while the integrated monitor enabled storytelling and demos. A built-in storage closet kept materials hidden and organized, and overhead stem lights drew attention to key messaging. Paired with branded counters and a purposeful layout, the result was a streamlined, engaging exhibit.
