

DRAW ATTENTION. BUILD AWARENESS. INSPIRE ACTION. WITH *Flags!*

Flags are one of the simplest ways to get noticed outside.

Their height, movement, and bold graphics naturally catch attention from a distance, helping brands stand out in busy environments. As flags move with the breeze, they spark curiosity and invite people to look closer, making them an effective tool for drawing foot traffic and encouraging engagement.

Flags reinforce brand awareness in an approachable way. The result is an outdoor display that attracts attention and encourages action.

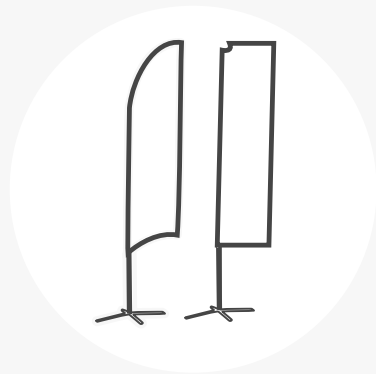

PURPOSEFUL & POPULAR

Flag Styles

Feather

High-movement flag for maximum visibility

Edge & Straight

Straight-edge design for clear messaging.

Teardrop

Taut curved design for a clean presentation.

Each shape offers a different balance of motion, readability, and style, to match messages, use cases, and environments.

THE RIGHT BASE FOR THE

Right Flag

Steel
Square Base

When selecting a base to keep flags secure, it's important to consider the flag size, the surface it will be displayed on, and if the environment calls for added stability.

Ground Spike Bases - Best for non-paved environments like grass, sand, or soil.

Cross Bases – Great for flat paved surfaces like sidewalks and can be paired with a weight for added stability.

Stackable, & Steel Bases – A heavier, low-profile option ideal for long term use in high-traffic or windy areas.

Fillable Bases – Easy to fill with water or sand, these portable bases work well for seasonal events & promotions.
